Since its publication in 2018 [The Woodpecker Method](#) has been the go-to manual among chess players with a thirst for tactical improvement. The **Woodpecker Method 2** is the long-awaited sequel, designed to skyrocket your positional decision-making skills.

The Woodpecker Method means solving a large number of puzzles over a period of weeks; then solving the same puzzles repeatedly, faster each time. This will program the subconscious mind, improving both accuracy and the speed of one's decision-making.

The Woodpecker Method 2 has 1000 positional exercises and solutions, with detailed guidance on how to gain maximum benefit from them. All the exercises have been checked and rechecked using the latest engines, as well as tested for valuable human feedback – among others by GM Nodirbek Abdusattorov, who ascended to 4th in the world rankings after working through this book.
