Opis produktu

Wersja językowa angielska. Miękką okładką. 280 stron.

Turbo-Charge Your Tactics 2 concludes a multi-year effort by **GM Mykhaylo Oleksiyenko** and world-renowned trainer **IM Vladimir Grabinsky** to create the perfect chess puzzle books. This second volume builds upon the first, using games from the World Champions and their challengers. Most chess games are decided by tactics, so solving tactical puzzles is the most effective path to improvement.

This book also contains a special chapter with expert guidance on how to use chess engines. The engines might analyse precisely but they can also harm our chess understanding if followed blindly, so we must know when and how to use them.

GM Mykhaylo Oleksiyenko was Ukrainian Champion in 2016, and is a respected trainer and content creator. He also holds a PhD in Mathematics.

IM Vladimir Grabinsky is a coach who is world-famous for his work with many strong Ukrainian Grandmasters.
